

PRESS RELEASE

FOR IMMEDIATE RELEASE: February 20, 2009

SUBJECT: UPGRADE TO CORPORATE WEBSITE

WICHITA, KS – Alliance Monitoring Technologies, LLC, a privately owned limited liability company that specializes in providing monitoring systems to the health care industry, has just announced the upgrading of its corporate website. "We believe this recent upgrade to our website will provide our present and potential customers with more information and access to all of our products and services," said Managing Partner / Marketing Manager, James Lindamood. "This is the digital age, and the best way to get our message out is to provide our market base a forum which enables them to send and receive information at the touch of a button. We invite our present clients, as well as future potential customers to explore our website and become better acquainted with how Alliance can help them provide a safe and enjoyable environment for their facility's residents and families.
